EDUCATION ENHANCEMENT

BETHEL CHRISTIAN SCHOOL IS COMMITTED TO HELPING EVERY STUDENT REACH THEIR FULL POTENTIAL THROUGH LEARNING ENHANCEMENT OPPORTUNITIES

- Carol Faves

We recognise that students come to our school having had different experiences and from diverse backgrounds. Some may have had traumatic events in their lives, have missed significant learning opportunities, have a first language other than English, or have a disability that effects their learning.

Bethel has a clearly defined process for identifying and assisting students who need to be a part of our learning enhancement program. We use evidence based approaches to remediate learning at the point of need.

Some students find learning easy and need additional challenges to help them extend their learning and engagement at school. These students are also provided for through extension opportunities that help them to pursue their love for learning.

Bethel employs additional teachers and education assistants in order to provide a high level of support both within the classroom or through dedicated support classes. We believe every child deserves the opportunity reach their God given potential.
